

# Future-proofing Europe's food systems with *Tools for Transformation* and the *Sustainable Food Systems Network*

FIT4FOOD2030 has helped deploy the European Commission Food 2030 policy framework, by bringing together a wide variety of stakeholders at the level of cities, regions and countries across Europe. Through its multi-stakeholder Labs, FIT4FOOD2030 has catalysed competence development, raised awareness and R&I policy alignment through systems thinking and Responsible Research and Innovation (RRI).

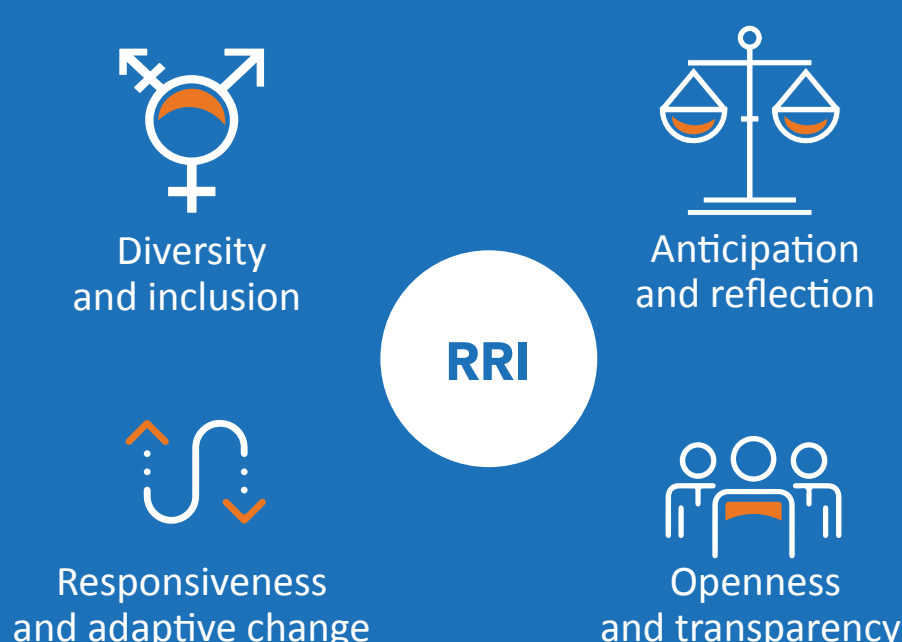

## The Right Ingredients for Change

Not only the European food systems need transforming, so does the way we do Research and Innovation.

## Responsible Research and Innovation

RRI involves all societal actors working together to better align processes and outcomes with the values, needs and expectations of society in mind.

## FOOD 2030 Platform

The multi-level FOOD 2030 Platform engages a diversity of stakeholders at European, national and local level. The experiences from the Labs have shown how multi-stakeholder partnerships can catalyse change, but only if they apply flexibility, rigour and methodology. It is a process that requires time and building trust. There are no shortcuts.

**14** City and Food Labs  
Building competences of current and future researchers, entrepreneurs, policy-makers, and society at large.

**1** EU Think Tank  
Supporting development and implementation of an integrated vision for EU food systems, R&I transformation and providing lessons for global collaboration on the societal challenges of Food and Nutrition Security.

**11** Policy Labs  
Strengthening R&I coherence and alignment between policies and programmes on Food and Nutrition Security.

## FIT4FOOD2030 Knowledge Hub

Based on the experiences from the multi-stakeholder Labs, FIT4FOOD2030 has developed a Knowledge Hub with hands-on resources to facilitate food systems transformation. It is a free and growing online repository of tools which can be used as a part of an integrated approach to encourage network building, visioning, system understanding and co-creating actions within the transformative networks of stakeholders and audiences.

<p><b>5 tools categories</b></p> <ul style="list-style-type: none"> <li>· Educational modules</li> <li>· Training and reflection modules</li> <li>· Short exercises for reflection and co-creation</li> <li>· Data sets</li> <li>· Communication tools</li> </ul> 	<p><b>80 Tools</b></p> <p><b>9 Target audiences</b></p> <p>Researchers, facilitators, policymakers, professionals, funders, NGO, CSO, Businesses, students.</p>

## Sustainable Food Systems Network

Breaking silos and collaboration between a wide diversity of stakeholders is key. The Sustainable Food Systems Network helps people connect, share knowledge, and inspire each other.

- A growing network that is open to everyone.
- Connects stakeholders at the level of cities, regions and countries from all over the world.
- Facilitates communication and collaboration in an engaging way.
